

We have prepared the accompanying description of Action1 Corporation's "Description of the Action1 Platform" for the period May 07, 2024 to May 07, 2025, (description) based on the criteria for a description of a service organization's system set forth in DC 200, 2018 *Description Criteria for a Description of a Service Organization's System in a SOC 2 Report (With Revised Implementation Guidance — 2022)* in AICPA, *Description Criteria* (description criteria). The description is intended to provide report users with information about Action1 Corporation's Action1 (system) that may be useful when assessing the risks arising from interactions with Action1 Corporation's system, particularly information about system controls that Action1 Corporation has designed, implemented, and operated to provide reasonable assurance that its service commitments and system requirements were achieved based on the trust services criteria relevant to security (applicable trust services criteria) set forth in TSP 100, 2017 *Trust Services Criteria for Security, Availability, Processing Integrity, Confidentiality, and Privacy (With Revised Points of Focus — 2022)* in AICPA, *Trust Services Criteria*.

Action1 Corporation uses a subservice organization to provide data center facilities and hosting services. The description indicates that complementary subservice organization controls that are suitably designed and operating effectively are necessary, along with controls at Action1 Corporation, to achieve Action1 Corporation's service commitments and system requirements based on the applicable trust services criteria. The description presents Action1 Corporation's controls, the applicable trust services criteria, and the types of complementary subservice organization controls assumed in the design of Action1 Corporation's controls. The description does not disclose the actual controls at the subservice organization.

The description indicates that complementary user entity controls that are suitably designed and operating effectively are necessary, along with controls at Action1 Corporation, to achieve Action1 Corporation's service commitments and system requirements based on the applicable trust services criteria. The description presents Action1 Corporation's controls, the applicable trust services criteria, and the complementary user entity controls assumed in the design of Action1 Corporation's controls.

We confirm, to the best of our knowledge and belief, that:

- a. The description presents Action1 Corporation's Action1 Platform (system) that was designed and implemented throughout the period May 07, 2024, to May 07, 2025, in accordance with the description criteria.
- b. The controls stated in the description were suitably designed throughout the period May 07, 2024 to May 07, 2025, to provide reasonable assurance that Action1 Corporation's service commitments and system requirements would be achieved based on the applicable trust services criteria, if its controls operated effectively throughout that period, and if the subservice organization and user entities applied the complementary controls assumed in the design of Action1 Corporation's controls throughout that period.
- c. The controls stated in the description operated effectively throughout the period May 07, 2024 to May 07, 2025, to provide reasonable assurance that Action1 Corporation's service commitments and system requirements were achieved based on the applicable trust services criteria if complementary subservice organization controls and complementary user entity controls assumed in the design of Action1 Corporation's controls operated effectively throughout that period.
